(54) Title: METHOD FOR ENCAPSULATION OF ORALLY INGESTED MATERIALS TO ALTER THE SITE OF DIGESTION, SITE OF ACTION, OR STABILITY

(57) Abstract: Comestible materials encapsulated by a film-forming composition including a plant protein source and methods of forming the same are provided. The film-forming composition affects the site of digestion of the comestible material within the digestive tract of an animal or a human thereby allowing the material to be most effectively utilized by the body. Also, the film-forming compositions maybe used to enhance the stability of the encapsulated material and prevent undesired interaction with other components of a mixture.
